**Volvo AB,**  
Göteborg,  
Sverige.

October 7, 2021

Dear Recruiter,

Hope you are doing well.

Hereby, I would like to express my interest in doing my masters thesis on the topic 'LCA of airbags' at Volvo. Job ID: 53968.

At present, I am a final year master's student studying sustainability engineering, specialized in environmental impact assessment, circular economy and energy & environmental management.

Being an enthusiastic sustainability student, I am fascinated by Volvo's motive to establish a circular business and low-carbon economy. The company's commitment to reduce its resource consumption and carbon foot-print inspired me to work with Volvo. 'LCA of airbags' is indeed a captivating thesis project for me, as LCA is my focus of study. Through my master's degree, I have acquired the required skills in Environmental impact assessments, Industrial ecology, and LCA. My recent LCA project with Tistelvind AB has provided me a solid ground experience in product life cycle assessment. It would be a great opportunity to do this interesting thesis in one of the world's sustainable firms as Volvo. I firmly believe that the experience and knowledge I possess in the relevant field would make me a desired candidate for the thesis project.

I appreciate you for taking the time to consider my application. You are welcome to contact me if you require a candidate with a background in Life cycle assessment coupled with industrial experience.

Sincerely,

Christo Sam Arul Inbaraj
